

IT Assessment

Do you know if your IT is secure and running efficiently?

In today's world, IT can be complex and hard to understand. A Vector Tech assessment will help determine the current state of your IT.

We start with a thorough onsite review of all aspects of your IT systems. Vector Tech professionals will use industry best practices, to determine the state of your IT Systems from the information collected.

Vulnerability Assessment

Endpoint Assessment

User Access Assessment

Compliance Assessment

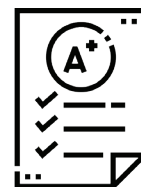

Patch Assessment

IT Infrastructure Assessment

Our team will then review with you a comprehensive report that gives recommendations how to best address any security risks and system inefficiencies that were found. Your business can then make informed and strategic decisions for IT. Reach out today to find out how this IT Assessment is right for your business.
