

Cloud Services

Business Continuity

Expand your building by having access to your data anytime and anywhere. Due to no downtime, your productivity will significantly increase.

Cost Savings

With no physical servers, you will save money in the short and long-term. IT expense predictability is simple because there are no physical hardware or hidden fees.

Security

Safe and Secure storage is an absolute necessity for your data. With VTG managed datacenters located here in Michigan, your company is always protected.

Collaboration

Break down the walls of your office to share documents and work with your team outside of the traditional methods.

Application Hosting

Rather than installing software applications on a computer, your business can run these applications directly from a hosted server.

Scalability

VTG's Cloud Solution is elastic so you can scale your user count and storage as needed.
